Zedcrest Case Study

Deimos Helps Client Achieve Infrastructure Transformation

Deimos assessed the client's infrastructure & provided a managed solution that is secure & scalable. It is based on Deimos' own blueprint & incorporates Google Cloud best practices. The solution can be customised to meet the client's specific needs.

THE CHALLENGE ⌄

Zedcrest Group faced challenges in securing & scaling their Google Cloud projects as they relied on manual workload setups without automation. Zedcrest were doing manual deployments and config management. The lack of automation & observability affected their ability to meet demands sustain an uninterrupted service.

THE SOLUTION ⌄

Deimos conducted an infrastructure assessment & deployed a secure environment inline with cloud native best practices. Working with Zedcrest they migrated the required workloads to the new environment. Successful transition facilitated by Google Kubernetes Engine, Cloud SQL, & Secret Management tools. Automation & observability were introduced to add additional value to the client.

Solution Pillars
- Infrastructure Modernisation
- Application Modernisation

Products

Google Cloud

THE RESULT ⌄

Automated Infrastructure Management empowers Zedcrest to focus on enhancing product features without worrying about the underlying infrastructure. Their workloads now benefit from a highly scalable & fault-tolerant environment, ensuring compliance with Google's three nines (99.9%) uptime requirements. This achievement bolsters infrastructure security, observability, supportability & scalability.
